Suggested Installation Instructions for C5 Corvette Center Console Cushions

TOOLS NEEDED:

- Phillips screwdriver
- Scissors

- 1) Remove the 4 screws that secure the console lid to the hinge assembly.
- 2) Remove the plastic back cover, paying attention to the direction the latching hook is facing. Set aside.
- 3) Adhere the double stick tape around the inside lip of the lid (Illus. 1). You may need to cut the corners and around the curves to make sure the tape lays flat. Do not allow the tape to overlap itself. Pull paper backing off of the tape.
- 4) Lay new cover and lid face down.
- 5) Insert lid into the console cushion so that the face of the lid is against the felt material. Holding the edge of the vinyl band with your finger, push the lid in with your thumbs (Illus. 2), so the vinyl band wraps around the lid.
- 6) Pull vinyl at holes and push vinyl over the round screw inserts (2 in the corners & 4 on the side).
- 7) Working around the cushion, pull the vinyl band in and onto the double stick tape. Turn over to make sure the cushion fits snugly on the lid (Illus. 3). (If not, pull that area of the vinyl band loose from the double stick tape, tighten & re-attach.)
- 8) Replace plastic back plate, ensuring the latch hook is pointed in the right direction. Re-attach to the hinge assembly and make sure the lid closes properly (if not, check the hook latch).
- 9) Lift lid and place a small screwdriver between the traction control plate and the plate accessory trim from the rear and gently pop the control plate out. Then insert colored trim piece and snap control plate back in place.
